

ABSTRACT**ASTHMA-RELATED ANTI-IL-13 IMMUNGLOBULIN DERIVED PROTEINS,
COMPOSITIONS, METHODS AND USES**

10

The present invention relates to therapeutic methods involving the use of at least one asthma related anti-IL-13 human Ig derived protein, as well as such proteins and isolated nucleic acids that encode at least one asthma related Ig derived protein, vectors, host cells, transgenic animals or plants, and methods of making and using thereof, including pharmaceutical compositions, methods and devices.
